DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 18 is rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6,072,796 (hereinafter referred as “Christensen”).

Christensen discloses the invention (**claim 18**) as claimed including a switching comprising:

- (c) a plurality of output ports coupled to the memory and to a second bus (see Fig. 1 and 6, elements 22A-22D, 50, 310) wherein each input port and each output port are coupled to a programmable counter having programmable start and stop values, the programmable counter having a start count and a maximum count and is programmed to increment the start value until the start value reaches the maximum count at which time the counter rolls over to the start count and continues to increment the start value until it reaches the stop value (see Figs. 1, 2, and 6, col. 5, lines 39-41, col. 6, lines 60-67, col. 7, lines 1-5, col. 8, lines 41-51).
